### **Part III DETAILED ACTION**

Claims 1-14 are currently pending.

#### **Restriction Requirement**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12,14 drawn to method for identifying potential ligands, classified in class 702, subclass 27.
- II. Claims 13, drawn to method for determining protein structure, classified in class 702, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and IV are related as independent methods which are not connected in design, operation or effect. These methods are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01). In the instant case, the methods

Art Unit: 1631

have different functions and different effects, and a reference teaching method of group I will not teach method of Group II.
